# FLEET

take the next step

*Fleet Shoes are modular shoes that have interchangeable treads and soles to let you customize your shoe to your needs*

## THE CONCEPT:

UPPER + TREAD + INSOLE = FLEET

*We have designed an innovative and unique connection system to allow you to have custom treads and insoles. You can convert your shoes to allow you to participate in multiple activities while protecting your ankles. The days of using running shoes for all activities are numbered. With our shoes, you can convert your shoes to give you ankle protection or more horizontal stability depending on the activity you are participating in. We will begin taking preorders soon.*
